

SECCFIRE EI₂ 60

Fire resistant sectional door

QUALITY SINCE 1967

Reliable Doors & Docks

Options

- ✓ Exterior face: Stainless steel 304 or 316.
- ✓ Interior face: Stainless steel 304 or 316.
- ✓ Rest of accessories: Galvanized steel or stainless steel sheet.

Seccfire, the fire resistant sectional door designed to compartmentalise fire and subdivide industrial areas, both indoors and outdoors. CE certified according to EN 16034/13241.

Key Benefits

- Automatic closing upon fire alarm activation.
- Fail-safe descent by gravity in case of power failure.
- High sealing performance against flames, smoke and hot gases.
- Robust galvanized steel structure designed for industrial environments.
- Sectional operation allowing normal daily use.
- Integrated safety photocell curtain system.
- Intumescent sealing joints expanding under heat for fire containment.

Max. Dimensions

5.000 x 5000 mm.

System

- Insulated sectional panels filled with high-density rock wool.
- Galvanized steel structure and guide system.
- Intumescent seals for fire and smoke containment.
- Motorized operation with gravity emergency closing.
- Control panel with UPS backup system.
- Integrated safety photocells.

Applications

Industrial buildings, logistics centres, warehouses, production facilities, parking areas, commercial buildings and fire compartmentalisation zones.
